Metrocare Expands its Network Across the Country

As part of our commitment to make healthcare more accessible and convenient, Metrocare has expanded its accredited facility network in key locations across Luzon and Mindanao.

The following facilities are now part of the Metrocare network:

- **The Paramount Medical Center** in Lipa City, Batangas
- **South Dental Care Center** in Sto. Tomas City, Batangas
- **Buhangin Medical Clinic and Diagnostic Center** in Davao
- **BMCDC Medical Station Co. Inc.** in Davao
- **BMCDC Health Care Inc.** in Davao
- **BMCDC Central Co.** in Davao
- **Holy Trinity Hospital of Tarlac City, Inc.** in Tarlac

With these new additions, members can enjoy wider access to quality medical and dental services closer to home. This is part of Metrocare's ongoing **Network Expansion Program**, which aims to bring healthcare to more communities while keeping costs affordable for our members.

We believe that by strengthening our network, our members will have more options for where to receive care, reduced travel time to access medical services, and better continuity of treatment. This expansion is a step toward ensuring that our members, wherever they are, can find accredited facilities within reach.

More accredited facilities will be announced in the coming weeks. If you wish to request accreditation of your preferred facility or physician, you may visit metrocarehealth.com/accreditation or contact us through the details provided in this newsletter.
