Metrocare Welcomes The Medical City Clinic to Our Accredited Network

We are pleased to announce that The Medical City Clinic (TMCC) has officially been accredited as part of Metrocare's network of facilities. With over 70 clinic locations across Metro Manila and key provincial areas of Luzon such as Laguna, and Batangas, TMCC brings with it a wide range of diagnostic and therapeutic services.

For more than 25 years, TMCC has focused on outpatient ambulatory care—serving patients from the well to those recovering or managing chronic illnesses. Their services include acute illness treatment, diagnostic imaging, surgical procedures, pediatric and OB-GYN consultations, physical rehabilitation, wound care, and more.

By adding TMCC to our accredited partners, Metrocare members will enjoy greater convenience when accessing outpatient care close to where they live or work. More locally available clinics mean shorter travel times, faster access to diagnostics, and better continuity of care.

We believe this partnership reflects our commitment to expanding affordable, quality healthcare access—especially for workers who rely on prompt, reliable medical care without excessive cost or delay.

More accredited facilities will be announced in the coming weeks. If you wish to request accreditation of your preferred facility or physician, you may visit metrocarehealth.com/accreditation or contact us through the details provided in this newsletter.

THE MEDICAL CITY CLINIC

Keep It Simple. Keep It Covered.

At **Metrocare**, we know what the average Filipino worker needs: a reliable healthcare partner that keeps things simple, affordable, and easy to manage. No frills, no surprises—just the coverage your people need to stay healthy and productive.
