Metrocare Welcomes New World Diagnostic to Our Accredited Network

We are pleased to announce the accreditation of **New World Diagnostics** as part of our growing nationwide network of diagnostic facilities.

New World Diagnostics operates **over 20 branches** strategically located across Metro Manila and North and South Luzon, providing **convenient access** to reliable laboratory services for Metrocare members. Their facilities are known for **its modern equipment**, **highly trained medical personnel**, and **commitment to accurate and timely test results**.

With this accreditation, members can avail of a wide range of diagnostic tests closer to their homes or workplaces. This supports early detection, proper monitoring, and informed medical decisions, while reducing travel time and out-of-pocket expenses.

Metrocare will **continue to expand its network of accredited facilities** to improve access, reduce out-of-pocket costs, and provide practical healthcare solutions for our members.

For questions on covered diagnostic services and branch availability, members may coordinate with Metrocare Customer Care or their assigned account representative.

More accredited facilities will be announced in the coming weeks. If you wish to request accreditation of your preferred facility or physician, you may visit metrocarehealth.com/accreditation or contact us through the details provided in this newsletter.
